

# TS 16949

## NQA: The internationally recognized leader for registrar services **Automotive**

### ISO/TS 16949:2002

ISO/TS 16949:2002 applies a common third party registration scheme for all automotive suppliers. The standard provides for global harmonization with other automotive manufacturers, allowing for improved quality products to automotive customers worldwide. Benefits to the customer include providing a platform for global sourcing and consistency in requirements. Registration to ISO/TS 16949:2002 increases customization to meet specific customer needs, improved products and processes, supply chain management, and reduced variation and waste, as well as increasing efficiency and common language to improve understanding.

### Sole Source for the Automotive Industry

NQA offers dedicated offices worldwide, ensuring our automotive industry clients a single source for all of their OEM requirements.

### International Recognition

As an IATF contracted registrar with operations in over 52 countries, NQA is ideally positioned to provide the global automotive supplier with cost-effective compliant solutions for all OEM and customer contracted requirements, including ISO 9001:2000 and ISO 14001.
